MobiMed Release Notes 4.47

Software Article Number: [490212389](#)

Software Build Number: Release-4.47_20.05.20.2

Release Updates

In this release, Ortivus is using a new versioning schema. This release 4.47 is a successor of 4.2.46.

The following new features are implemented in 4.47:

1. EPR History for PreHospital Care
2. SCASFT CCN-202 Sudden Death Procedure
3. SCASFT CCN SC204 - access the Hampshire Health Record (CHIE) via the web browser in the ePR.
4. SCASFT CCN-215 SCR Feedback
5. SCASFT CCN-300 Falls Template
6. General Improvements
7. Fixes

Contact Customer representative for more information.

Show eprHistory as a tab

ePR History Tab displaying Vitals when using MobiMed for Primary Care

Following changes are done:

The History Tab is displayed if a confirmed social security number is entered and the user is signed in. In the event of that nor the ID for the patient nor the MobiMed user is signed in, the tab will be empty

The screenshot shows the 'Historik' (History) section of the ortivus patient management system. The interface includes a sidebar with navigation options: Patient, Historik, Foton, Vitaldata, SBAR, and Utvärdering. The main area displays a table of historical data for patient (20050505-0500). The table columns are: Tid Skapad, BT syst, BT dia, Temp, HF, SpO₂, Resp, EtCO₂, NRS, and P-glukos. The data is as follows:

Tid Skapad	BT syst	BT dia	Temp	HF	SpO ₂	Resp	EtCO ₂	NRS	P-glukos
2020-05-15 14:31:36									
2020-05-14 15:46:56									
2020-05-14 15:42:29	119	79	36,9	66	99	17	6,1	1	4,8
2020-05-14 14:42:10									
2020-05-14 14:35:40									
2020-05-14 11:44:31									
2020-05-14 11:34:56									
2020-05-14 11:29:13	119	79	36,9	64	97	15	5,9	0	4,1

SCASFT CCN-202 Sudden Death Procedure

This procedure seeks to provide a proportionate response to deaths in the community, allowing the most appropriate resource to attend, assess, and manage such incidents e.g. Police. It also covers "Confirmation of Death I Recognition of Life Extinct" since only Doctors can certify death.

Deaths can be classified as the following:

- Suspicious Deaths - another person suspects another person has or may be involved in the death.
- Natural Deaths - death has been established as being due to natural causes.
- Certified Deaths - a doctor has certified the medical cause of death.

SCASFT CCN SC204 - Access the Hampshire Health Record (CHIE) via the

web browser in the ePR

Regional Online Clinical Portal Access Component that will enable MobiMed to launch an external browser window with SSO to the CHIE portal displayed for the patient.

Note: The CHIE portal does not support Windows 8 meaning that a browser change is required on MobiMed units running Windows 8. The browser change is not part of this CCN.

SCASFT CCN-215 SCR Feedback

As part of a CQUIN, SCAS needs to improve the quantity and quality of feedback to GPs on retrieved Summary Care Records. This CCN details the changes required to achieve that.

4 new buttons have been added to the Alternative Care screen (accessed via Final Disposition) to provide feedback options.

All buttons in the "Summary Care Record" section (the 4 new + the Yes/No buttons for the pre-existing questions) are disabled unless an SCR has been reviewed (not just downloaded). This is to prevent feedback from being given without having read an SCR.

SCASFT CCN SC300 - Falls template

The Falls Template is part a series of templates for crews to complete when attending particular types of incidents. These templates will guide crews through the relevant essential fields, with the stated aims being ease of use for crews and an improvement in cycle time for those incidents. This CCN covers the first template, for patients who have fallen (excluding falls > 2m).

Ambulance Crew can enter the Falls template and document reason for falls, time of fall etc.

Minor Changes and General Improvements

Prevent MobiMed user from adding "new patient" on device during software update[10599]

In some rare cases, access to the local database is not correct if a new patient is created during an ongoing update. Therefore "New Patient" is disabled during updates.

Update downloader shall pause before retrying if it lacks permissions to access the files[11032]

The problem is related to when downloading guidelines and the files are not accessible to the PU. The PU will stop attempting to download guidelines if this

problem occurs.

Improved logging of ECG export functionality[10997]

When exporting ECG data, logs were only stored on the client. This has been improved to also store logos on the server.

Show error message if the user tries to send empty ECG. [10999]

In the event of that, the user tries to send empty ECG an error message will be displayed (e.g cables lost, no connection)

Fixes

- Resolved an issue were the default camera was not pre-selected[10935]
- Resolved an issue were the on-screen-keyboard was visible when navigating the ePR.[10021]
- Resolved an issue were MobiMed could crash if another application was using the Camera (e.g. Skype) while user attempt to use the camera in MobiMed[10975]
- Resolved an issue on desktops where the splash screen was hidden behind the login screen when there is an issue with connecting to the database. Splashtscreen is now hidden after 30 seconds[10860].
- Resolved an issue that could cause the telemetry service to not restart if the unit changed state from sleepmode[11059]
- Resolved an Issue where Spell check and handwriting did not work correctly [10936]

Supported Platforms

Hardware Unit

Getac RX10H

Getac RX10H Extreme

Getac UX10

Lenovo 20L3000

Operating System

Windows 10 (1511)

Windows 10 (1709, 1809)

Windows 10 (1809)

Windows 10 (1809)

Lenovo Thinkpad L490	Windows 10 (1909)
Panasonic CF-19	Windows 7
Panasonic FZ-G1	Windows 10 (1607, 1709, 1809)
Panasonic H2	Windows 7, Windows 8.0
Panasonic FZ-M1	Windows 10 (1709)

All versions of measuring unit M531 are supported with MobiMed 4.2. Measuring unit 300C is not supported.

The Clinical Workstation (CWS) platform should meet or beat the minimum hardware specification and use a supported operating system.

Installation and deployment

For installing this release. Please contact our Service and Support at the below addresses.

- **UK market:** support@ortivus.co.uk
- **Other markets:** support@ortivus.com

Release Information

This is a commercial release on the following markets:

- Norway
- Sweden
- United Kingdom

This release replaces all previous 4.2 releases.

Upgrade to this release can be done from all previous 4.2 releases.

Please contact your customer representative for more information
