

## MobiMed Release Notes 4.54

Software part number: [490212558](#)

Software build number: 4.54\_2021.03.26.1

### Release Updates

The following are implemented in 4.54:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

## Change Requests Implemented

### SCASFT CCN SC237 - Consent Field Rollback (12674)

ePCR change to make registering consent optional and add text to warn the user that hospital users won't be able to review the ePCR if No is selected.

### **SWASFT CCN SW2.1 - Framework for Safeguarding in MobiMed PU's and CWS's (11275)**

A complex pathway has been created to make safeguarding referrals digital instead of manual. When the correct conditions are met, the receiver or receivers will be looked up and secure emails will be sent.

### **SWASFT CCN SW2.030 - Adding local database for matching UK post codes to local authority (12327)**

Added functionality to be able to import the ONS Postcode Directory to a local database cache that is used in the safeguarding flow to retrieve the local authority codes for a specific post code.

Importing the directory is a task for the Ortivus support and will be probably performed 4 times a year.

### **SWASFT CCN SW2.034 - CWS Search by incident number (12121)**

Added quick search option for searching by incident number in CWS Search.

### **SWASFT CCN SW2.044 - Time waiting in ambulances (12516)**

Added possibility to register information when a patient is waiting to be admitted to hospital.

### **SCASFT CCN SC314 - Dates and Times updates (12526)**

Changed several date-time pairs to be single combined date and time entries.

### **NIAS ePCR**

As part of preparing to roll out the ePCR, a major rework has been done.

## **General changes and improvements**

### **Support for RETTS [2021 \(12650\)](#)**

Upgrading RETTS to match the 2021 version

### **Improvements of integration engine (12181)**

Configuration simplified

### **Email - Add warning message that local eprconfigs cannot be emailed (12577)**

### **Updates to ECG reports (12604, 12605, 12688)**

Readded missing print button for ECG and adding callsign and incident number to report.

### **Added setting to enable hiding of Send alert button (12633)**

A new setting (HideAlertButtons) added so that alert buttons may be hidden

### **Changes to AD-LDS default user handling (12702)**

The old mechanism for defaulting the AD-LDS user name and password has been changed to require a registry entry. If the entry isn't available an entry will automatically be created. This is changed due to different password policies at different installation sites.

### **Improved server upgrade experience (12703)**

## Fixes

Fixed error when uploading of record definitions (11919)

Fixed error when pacemaker spikes sometimes were not drawn in the real-time waveform view (12601)

Fix in AdminTool: When changing settings, the "Reason for change", the text will end up in the audit log (12613)

Fixed for Örebro: PDFWebService used from KP (Klinisk Portal) could mix patient identity between simultaneous users (12651)

Fixed that new SITHS smartcards is recognized by MobiMed (12655)

Fixed error in SCASFT ePR regarding Cannula Date & Time (12684)

Added missing database index to deployment (12720)

Fixed intermittent database performance issue (12721)
