

## MobiMed Release Notes 4.58

Software part number: [490212682](#)

Software build number: 4.58\_2021.10.08.3

### Release Updates

The following are implemented in 4.58:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

## Change Requests Implemented

SCASFT CCN SC310 Removal of printers (12579)

Update regarding role form (13211)

SC322 - SNOMED and ADS Updates (13019, 13170)

Fix for problems with CPI in SCAS ePR. The CPI features broke when doing the ADS/SNOMED updates in 4.57. This has now been resolved.

SC326 - Safeguarding, Medicines and Pain Scores (13123, 13124, 13204)

Implementation of set of changes regarding Safeguarding, Medicines and Pain Scores.

NI007 - ePR Updates since SCR [00250 \(13125\)](#), 13126)

Implementation of a set of minor changes to the ePR.

SW2.012 - Staff association with interventions (13133, 13134)

Implementation of component that collects data from the crew fields and lets the user select one of them in other parts of the ePR. E.g. to register who has performed an intervention or administered a medication.

**2. Primary Survey**

**No information recorded by Ambulance Crew (relevant to the form output)**

Type text to find...  Zoom 160.14%

SW2.055 - Out of Signal Signing (13129, 13130)

Added possibility to register receiving staff id manually when doing a WLAN handover when the receiver isn't logged in and the device is offline.

SW2.059 - Deterioration of patient post arrival at hospital (13131, 13132)

Added fields to ePR for registering patient deterioration while waiting for admittance to hospital.

**Has the patient been kept waiting in the ambulance?**

Yes No

**Time patient entered department**

21:18 X

**Patient became increasingly agitated/confused or deteriorated/came to harm as a result of the delay / long wait in the ambulance**

Yes No

**Please provide details here and complete a separate Datix**

SW2.062 - Missing Fields on the Main Report (13327, 13323)

Partial release of CCN. Include more fields in main report and an update to the intended conveyance.

## General changes and improvements

Improve connectivity, allow KeepIpUp to let Windows handle connections (12828)

Improvement of ECG-review, configurable to show ST levels in mm or mV (13326, 13306)

Improvement of MQTT handling, Singapore (13199)

Improvement: Allow log levels to be changed in runtime without a restart (13279)

Improvement: Add performance logging to DBI/REST/DB for actual time for calls (13280)

Added API endpoint for requesting basic count of usage of epr variables (13305)

Added configuration of maximum time to keep MQTT subscriptions, Singapore (13315)

ePR fixes after NIAS UAT of 4.57 (13223, 13250, 13335)

Singapore - Add a watcher to kill any lingering Chromium report instances (13344)

Singapore - Improved error handling of import failure of files in MHA (13355)

Singapore - Implemented so that errors from Javascript report generation outputs into to the REST log (13357)

## Fixes

Correction alert message text (13218)

Always close ECG report preview when losing focus (13224)

Fixed so that ECG history shows both ECG times when comparing (13281)

Added additional check of DBI request lengths related to REST calls, Singapore (13282, 13288)

Fixed so that MobiMed window wouldn't spontaneously maximize when running as a regular windows application (13342)

# Installation and deployment

For installing this release. Please contact our Service and Support at the below addresses.

- UK market: [support@ortivus.co.uk](mailto:support@ortivus.co.uk)
- Other markets: [support@ortivus.com](mailto:support@ortivus.com)

## Release Information

This is a commercial release on the following markets:

- Norway
- Sweden
- United Kingdom
- Italy

This is also a system component release for the following markets

- Singapore

Upgrade to this release can be done from release 4.2 and onwards.

Please contact your customer representative for more information.
