## MobiMed Release Notes 4.61

Software part number: [490212750](#)  
Software build number: 4.61\_2022.02.16.1

### Release Updates

The following are implemented in 4.61:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

## Change Requests Implemented

NI014, JR-CALC guidelines button on the start page (13619)

It is possible to show the JRCalc on the start page by entering `jrcalc://0` to the `DefaultGuidlineDocument` setting

NI015, Minor ePCR changes (13618)

Implementation of a set of minor ePR changes.

SC337, Output report vs Email addresses (13625)

Implemented the possibility to filter available output reports based on destination. If a report is selected only allowed referral destinations will be available. Availability is configured in the LimitEmailAddressesPresented setting

SC339, Graphnet SSO (13500)

SCAS can in earlier releases use the Orion SSO to access the shared patient record system in Hampshire CHIE. With this CCN the Thames valley shared record will be available by using the GraphnetSSO.

The screenshot shows a search interface for NHS numbers. At the top, a search box contains '011 111 1111'. Below it, there are three sections:

- Hampshire Health Record CHIE:** 'No validated NHS number or not logged in'. A 'Browse CHIE' button is visible.
- Graphnet:** 'No validated NHS number or not logged in'. A 'View Graphnet' button is visible.
- Summary Care Record:** A green checkmark icon and the text 'The patient has an SCR'. Below this is a warning: 'STOP. Has the patient given you permission to view their Summary Care Record? The usual legal, ethical and professional obligations apply when accessing a patient's clinical record'. There are three buttons: 'Yes ↓', 'No', and 'Emergency ↓'. A note at the bottom says 'Please login to Spine with your Smart Card to view the SCR'.

The screenshot shows a patient record page for Alex (Mrs). The patient information bar includes: Female Sex, 01-Jan-2000 (22y) Born, and 011 111 1111 NHS No. The page is divided into two main sections:

- Care and Support Plans:** A table with three columns: 'About You Review', 'Care and Support Plan Review', and 'Contingency Plan Review'. Each column has fields for 'Review Date:', 'Responsible:', and 'Role:'.
- Allergies:** A section showing 'Showing 1 - 2 of 2 items'. It lists two allergies: 'Shellfish Allergy' (17-Feb-2013) and 'Penicillin' (15-Aug-2012). For each, 'Severity' and 'Reaction' are noted as 'not recorded'. There are 'Orglinks' and 'Notes Present' links for each.

SC342, Presenting complaint search (13616)

Following the introduction of the SNOMED updates, users have struggled to find the most appropriate entry for the 'Presenting Complaint' fields. In this CCN a search functionality was put in place to make the selection easier. The search is done on the chief complaint but when a selection is done, both the chief complaint and the corresponding category is set.

SC343, Meds changes for IOW (13617)

Addition of new medications to be used by IOW.

SC345, Respiratory Assessment Tab (13741)

Addition of a new ePR page with the corresponding updates to reports

SW2.029, Clinical validation (13622)

Implemented web listing of records in need of clinical validation. Validators having this tool open will see any new validation requests and by clicking the request the record opens in the clinical workstation.

MobiMed Web Portal
Logged in as nurse@swasftad.local (2022-02-11 16:35:15)

## Clinical Validation

Include care episodes under validation

ETA	CreationTime	Callsign	Age	Gender	PatientId	Name	Creator	Diagnosis Condition	Diagnosis Chief Condition	Validation State	Validate
	2022-02-10 14:10	CF5D								Requested	<a href="#">↗</a>
	2022-02-10 11:55	A451					SWASFTAD\paramedic			Requested	<a href="#">↗</a>
	2022-02-09 13:59	3412				pat2 pu1	SWASFTAD\paramedic			Requested	<a href="#">↗</a>
	2022-02-09 13:21	123-458	43	Female	000 009 4447	Sarah Sten	SWASFTAD\sysadm			Requested	<a href="#">↗</a>
	2022-02-09 09:55	3412	30	Male	000 009 4447	fg df	SWASFTAD\Paramedic			Requested	<a href="#">↗</a>

SW2.035, Referral form matching (13623)

Implemented the possibility to filter available output reports based on destination. If a report is selected only allowed referral destinations will be available.

Availability is configured in the LimitEmailAddressesPresented setting

SW2.063, Issues with automation (13621)

A set of changes on the automated referrals to make the functionality better. The changes are to do the GP email address lookup as soon as possible, added visual feedback on referral status, and some minor visual improvements.

SW2.067, Add Metoxyflurane to medications (13682)

A minor medication list update

## General changes and improvements

EPR updates after UAT, NIAS (13649, 13763)

Adjustments to "reservnummer" validation for Jönköping (13672)

Support for modern browsers (13759)

Possible to configure default browser used from MMM

## Fixes

INC0107607, Fix for AdminTool map not showing (13772)

INC0108108, Fix for a problem where it wasn't possible to open patient on CWS after sending an alarm, Jönköping (13761)

Fix for audit log viewer not able to list entries if too many and searching for free text (13157)

Fix for WebPortal, that sometimes audit logs "Unknown" as username, SWAS (13579)

Fix for crash when too much information in body map, NIAS (13591)

Fix for Smart Server Installer that crashes when installing on a new server (13593)

INC0107307, Fix for problem with pain score sync between vital signs and pain assessment (13607)

Fix of problem with GP reports, possible to queue multiple reports, SCAS (13737)

Changes to Bluetooth device driver selection could earlier cause the device to hang (13739)

Added additional logging to monitor windows airplane mode since this has caused some error reports (13740)

INC0108125, fix for a problem with signing ePR because of duplicate required fields in presenting chief complaint, SCAS (13749)

Fixes on datacenter synchronization, OMNII (13760)

Fix for alarm sounds playing when silenced (13653)

No ST analyze will now show the reason why the ST analyze fail on PU (13665)

Fix in NIBP trends, all NIBP value will now show in the NIBP trend diagram when using autocapture (13614)

Fix in ECG Review, beat detections are now synched to the ecg (13643)

INC0108198, fix of screen freezing (13825)
