

## MobiMed Release Notes 4.62

Software part number: [490212772](#)  
Software build number: 4.62\_2022.03.25.4

### Release Updates

The following are implemented:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

### Change Requests Implemented

NI012 - EDT Integration, Case Data Write-back (13624)  
Send EDT and NIECR reports to HSCNI on signing ePR. Integration prepared in MobiMed, only integration testing with HSCNI and configuration of HospitalIntegration.

NI013 - PPCI ECG Report (13824)

Implementation of a new PPCI ECG Report where the ECG is shown in landscape mode and scaled up as much as possible.

SE-M-009 - Saturation/pulse sounds according to [60601 \(13943\)](#)

Enable playing saturation/pulse sound according to the latest version of 60601. Can be activated with a setting.

SE-T-001 - Befreg for Örebro (13816)

Transfer additional information from patient demographic service to MobiMed

SW2.051 - Quick fill (13823)

Add a possibility to register that a patient couldn't be located and give a description. If no patient was found certain fields shouldn't be required for the user to sign the record.

SW2.071 Capacity Mandatory (13915)

Making "Is Patient Over 16" mandatory

## General changes and improvements

Minor fixes after NIAS UAT of 4.61 (13869)

Improvements on Bexen AED integration

- Bexen shock event not updating when monitoring (13901)
- Enable possibility to sync time (13887, 13892)
- Improve robustness when having transmission problems (13905)

Cosmic FHIR: sending updated NEWS2 with Cosmic ID (13778)

Update Demo epr for RETTS [2022 \(13688\)](#)

Upgrading application frameworks, some projects has been moved from .Net 4.0 to 4.6.1 (13755)

Updates to the server installer (13855)

Shutdown computer if battery is below a critical limit (13883)

Improvements to reduce startup time of MobiMed by reducing lockout time in the UpdateService (13893)

Improvement on Search and fill component (13957)

## Fixes

Improvements regarding datacenter transfers, primarily improved error handling, Singapore (13934)

Responsiveness improvement, moving EprHistory server calls on a background thread (13936)

Fixed problem with KeepipUp filling the MMM log (13939)

INC0108420 - Investigate issues with time service, NIAS (13902)

Fixed problem with Cosmic final note not received correctly (13903)

Improved error logging of email sending in hospital integration (13675)

Fix for blocking email sending for Demo patient (13820)

Fix for problem with eprHistory control showing inconsistent number of records (13821)

Fix for problem with AdminTool-Remove Devices not removing device (13872)

INC0108329 - Fixed problem with DWH data definition not being updated configuration when uploading as zip-file or when a RecordDefinition.json was available (13873)

Improved error logging in the MobiRest service, logs were missing exception details (13890)

Improved clean up of temporary files from report generation (13894)

Fix for error showing up in log from Corpuls when waiting for D-ECG (13918)

Fix for faulty guideline link for camera policy, NIAS (13940)

Fix for incorrect registry path in WmiChangeEvent for Windows 7 (13949)

Fix for crash in eprHistorySelector (13950)

Fix for warning at the start of Lifepak plugin (13952)

Monitor improvement - ECG, remove baseline reset from the preprocess as it seems to cause more problems than it solves (13888)
