

## MobiMed Release Notes 4.64

Software part number: [490212828](#)

Software build number: 4.64\_2022.06.20.01

### Release Updates

The following are implemented:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

## Change Requests Implemented

SE-X-003 - Digitalt vårdmöte (13830)

Adding a new tab for WebView2 instead of a popup of a window.

SW2.040 - Referral automation phase 2 (14134)

New receiver named Coroner and a new epr variable for Email addresses that will be used both as a triggering variable and holding the email address. Function to Lookup the Email address from the incident postcode. Add the Criteria Death (CoD) time. New Coroner report. New configuration to the Hospital Integration to send the Coroner report. New setting for Care Provider Referrals Email that can be set to a destination in the system configurator. New Acute report, to figure out if an acute referral report shall be sent.

SW2.070 - Research page changes (14135)

New settings for research types and names, changed the research page to have time values and added values from settings in combo control.

SC318 - Dementia Tab (14136)

Add tab "dementia" between Neurological and Other PMH under AMPLE> Past Medical History. Button and text field if the patient suffers from dementia.

This should show in the reports, PCR, Redacted, Falls, Rec booking, Safeguarding, TIA.

INT026 - New relay card (14176)

The relay will be used on CWS in Hospital and activated when an alert is received.

INT023 - Show computer hostname in the information overview (14226)

Show tablet hostname on information overview. When pressing the Ortivus logo the device should display the unit hostname. This is for making the 500EMS pairing easy as the device shows the device name and not MMMname etc.

## General changes and improvements

SOS Integration - Örebro - Allow insertion of several NEWLINE in SOSConcatenateMapString (14268)

New lines added in notifications to separate the message string from SOS.

## Fixes

- Improved execution of SetPatientData, Singapore (14184)
- PRB0107802 - fix to avoid IP packets being routed through the Ethernet adapter when the adapter isn't connected to the DBI server (14203)
- Fix of problem with showing wrong info in network information popup if multiple mobile broadband profiles are available (14232)
- Fixed problem with ECG not shown in Review View-tab for earlier patients (14256)
- INC109244, removed use of Microsoft Windows Unquoted Service Path Enumeration (14212)
- Change to which patient data should be mandatory, Vestre Viken (14251)Fix of an issue with ePR component for multiple choice (14265)
- Fix for failed email resend, it was possible that failed sends weren't marked correctly to enable resend (14274)
