

MobiMed Release Notes 4.65

Software part number: [490212851](#)
Software build number: 4.65_2022.08.29.1

Release Updates

The following are implemented:

1. Change Requests implemented
2. General changes and improvements
3. Fixes

Change Requests Implemented

SC348 - Mandatory Dual Pain Score, implement and review (14299)

Post-treatment pain score is mandatory if pain score before treatment is given on tab STEMI or Trauma and is a "Missing mandatory fields" list when closing/signing the record.

ST0004 - Request patient records from MHA

It is possible to send a request with the REST interface to the SPF to retrieve old care episodes for a given Patient ID.

SW2.072 - Add Dropiradol to medications

Updated Medications list as request.

SC344- Additional Home Screen Buttons (14444)

Add additional logging of navigation to websites in WebView2. Added more logs to be able to see where the browser navigates to.

NIAS - ePCR updates after feedback (12170)

NIAS - change handover time from NIAS clinician sign to Hospital clinician sign.

General changes and improvements

Log which measuring unit was connected on a care episode. (14344)

- Log what measuring unit was connected on a care episode for follow up troubleshooting
