CEO Statement

Ortivus expands into new markets

Ortivus has opened the doors to the Australian and New Zealand markets through a partnership with the Trapeze Group. The work has been preceded by a thorough marketing analysis, which revealed both a market demand and great potential for Ortivus’ solutions on the markets. In terms of size, this market is about three times as large as the Nordics, with large distances that requires significantly more ambulances per inhabitant. Trapeze is a global company that has a strong presence in the region and a market share of about 2/3. They provide communication solutions for dispatch and vehicle analysis and serve a large number of customers within the prehospital care market in Australia.

With this partnership, the companies can work together to offer communication throughout the care chain. The total solution will be a combination of Trapezes solutions and Ortivus’ MobiMed ePR and Monitor. Several ambulance operations in Australia have already shown interest in the solutions that Ortivus and Trapeze offer.

Ortivus has also opened up a new segment regarding defibrillators, where two major contracts have been signed with Region Jönköpings Län. One of the contract signed during the quarter, regards semi-automatic defibrillators, so-called Automatic External Defibrillators (AED) to Region Jönköpings Läns hospital operations. The second award, which was announced after the period end refers to more advanced defibrillators that will be used in the hospital, in different wards and in operating rooms.

These two contracts, which have a total order value of 6 MSEK, cover a new product segment for Ortivus, which creates opportunities for more businesses within the same area.

Sales in the third quarter amounted to 24.5 MSEK, which is on a par with the previous quarter. Sales decreased by 4% compared corresponding period last year. However, the periods are not directly comparable, as the third quarter 2020 included non-recurring deliveries to our UK customers. Our ongoing deliveries to Region Jönköpings län and Singapore provide a favorable product mix for the quarter. This is reflected in our gross margin which improved to 51% compared to 31% last year. Operating expenses increased during the quarter compared with the corresponding period last year, which is mainly due to personnel costs that increase as the business grows. The operating margin was 11% (5%).

Ongoing deliveries, within the framework of our contracts with Singapore and Northern Ireland, has led to the achievement of several important milestones. MobiMed ePR is now in clinical use in a large part of the ambulance fleets in both Singapore and Northern Ireland. The rollout will continue during the autumn as the training progresses. South Central Ambulance Trust in the UK, which in 2020 extended its agreement with Ortivus for another 5 years with the possibility of extension for 1 + 1 years, has during the quarter upgraded hardware and software in all of their 450 vehicles. South Central Ambulance Trust has thus been upgraded to Ortivus latest and most modern ePR system which will be used for many years to come.

The development of new products is ongoing and the first demonstrations of the next generation MobiMed - MobiMed Unity, were held during the quarter at a Swedish trade fair for ambulance personnel. The reactions were very positive, and more product news will be released in the coming quarters.

The primary care offer has been well received in Region Örebro and Region Jämtland-Härjedalen with several other regions showing great interest. The roll-out has been somewhat slower than planned. In this area we also see opportunities in creating partnerships to be able to offer a broader solution.

The relief of many Covid-19 restrictions has made it possible to again participate in conferences, and after a break of almost two years, we have now participated in a number of physical fairs. Many trade fair organisers have used a hybrid model where visitors can choose to be on site physically or attend lectures and visit exhibitions digitally. This model is probably here to stay.

We look forward to continue our work delivering solutions for the future digital healthcare, both to our existing customers and to customers on our new markets.

Results

- Gross profit amounted to 12.4 (7.8) MSEK and the gross margin was 51% (31%).
- Operating expenses (selling, administrative and research & development expenses) amounted to 8.9 (6.5) MSEK. The increase is due to personnel expenses, which increase as the business grows.
- Other operating income and expenses consist of realised and unrealised exchange rate effects of -0,8 (-0,1) MSEK. These largely consist of revaluation of forward exchange contracts over the income statement amounting to -0.6 MSEK, as the Group's major revenue streams are hedged.
- Operating profit amounted to 2.7 (1.2) MSEK.
- EBITDA amounted to 4.1 (2.0) MSEK.
- Profit after tax amounted to 2.7 (1.2) MSEK, which corresponds to earnings per share before and after dilution of 0,06 (0,03) SEK.

Financial position

Intangible fixed assets mainly consist of previously capitalised development expenses for MobiMed ePR but also of expenses for further development of both MobiMed ePR and Monitor. See further under the section "Important estimates and assessments". Investments in intangible fixed assets during the quarter amounted to 1.7 (0.7) MSEK. Amortisation of intangible fixed assets amounted to 0.9 (0.4) MSEK during the quarter.

Alternative key figures

Ortivus applies the European Securities and Markets Authority's (ESMA) guidelines for so-called alternative performance measures (APM).

An APM is a financial measure of historical or future results development, financial position or cash flow that is not defined or specified by IFRS. The company reports a number of alternative key figures in the report, these are defined in the section "The Group's key figures".

Important estimates and assessments

Ortivus assesses that there are no estimates in the current financial statement that are associated with significant risk of notable changes in the reported amounts.

The following text describes important estimates that are associated with risk of changes in the reported values, but where the risk is not significant or where the possible adjustment is not notable or where it is not expected to affect reported values in the coming year.

Value recovery of development expenditure

The risk that balanced development expenses would not be recovered is dependent on future market potential for the developed products as well as prices and manufacturing costs that form the basis for estimates and calculations made before each development project is initiated.

Alterations in these conditions could have a significant impact on the carrying amount of the project, presented in the consolidated balance sheet.

Forward-looking statements

All forward-looking statements in this report are based on the company's best assessment at the publication time. Such statements comprise, like all future assessments, risks and uncertainties, which may mean that the actual outcome will be different. In addition to what is required according to current legislation, forward-looking statements only apply the day they were made and Ortivus does not undertake to update any of them in case of future events or if new information is obtained. Ortivus makes no forecasts.
