MobiMed FleetCtrl

Simplifying Medicine Inventory Management

Discover a new era in medicine inventory management with MobiMed FleetCtrl, designed for paramedics and ChiefAmbulance Officers (CAO) alike. Our innovative system offers a simple and straightforward approach to inventory management while enhancing big data analysis capabilities. Discover how MobiMed FleetCtrl can revolutionise your medical operations and optimise efficiency. Our innovative solution simplifies the tracking and monitoring of drug carrier bags and drug documentation, providing real-time insights on bag usage, station allocation, and ambulance utilisation. With MobiMed FleetCtrl, you can ensure optimal inventory control while streamlining data management for paramedics.

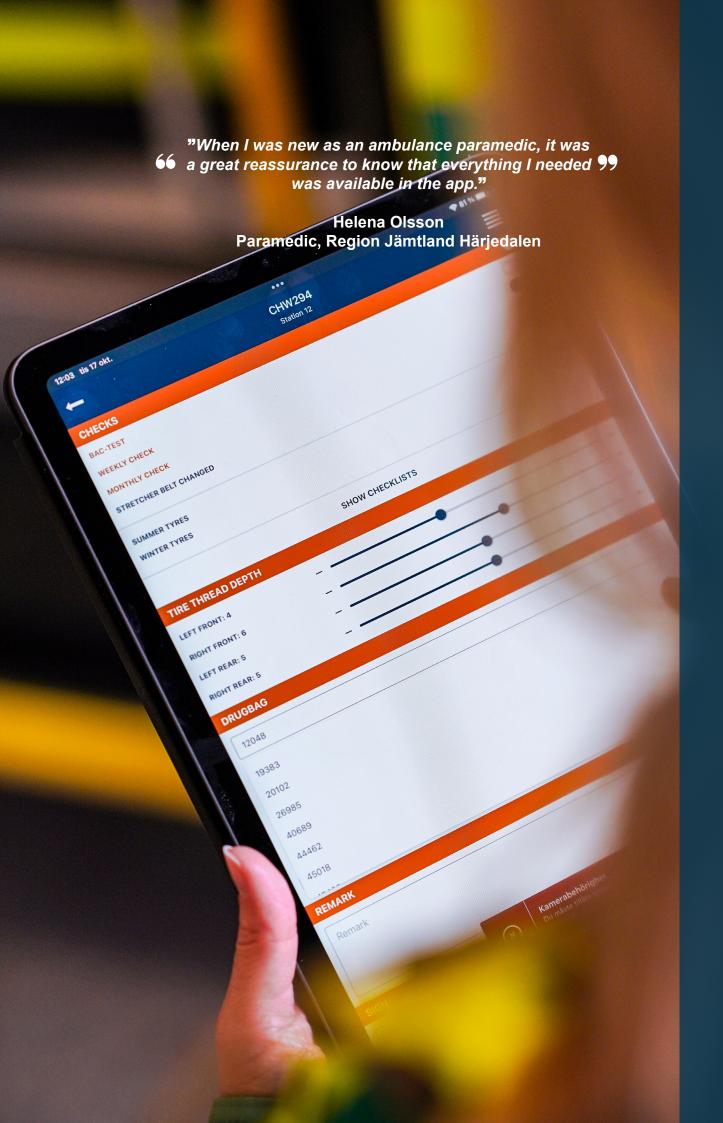

Experience the future of efficient and transparent medicine management.

Customisable Solutions

At MobiMed, we understand that every organisation has unique requirements. That's why our team works closely with you to customise MobiMed FleetCtrl to align with your specific needs.

Analyse narcotic usage among individuals, ambulances, and locations. Enhance the value by comparing multiple medications for efficient drug inventory management.

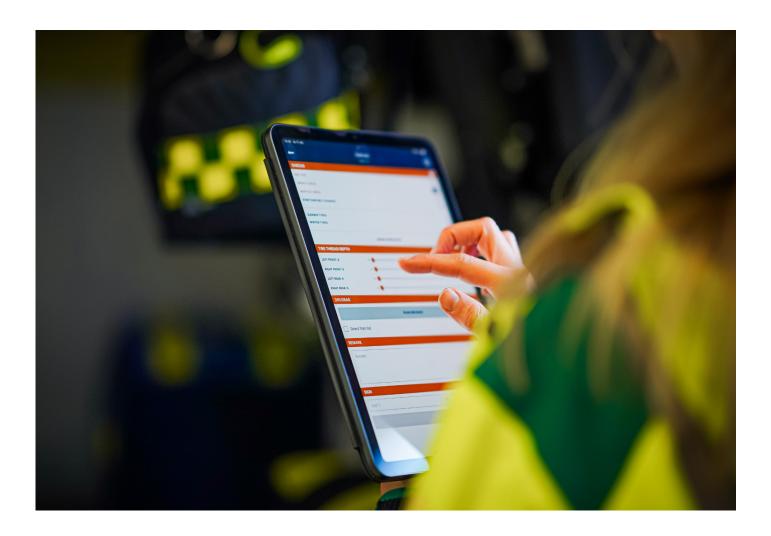

Create automated alerts, and facilitate drug inventory forecasting, enhance transparency through annual information tracking.

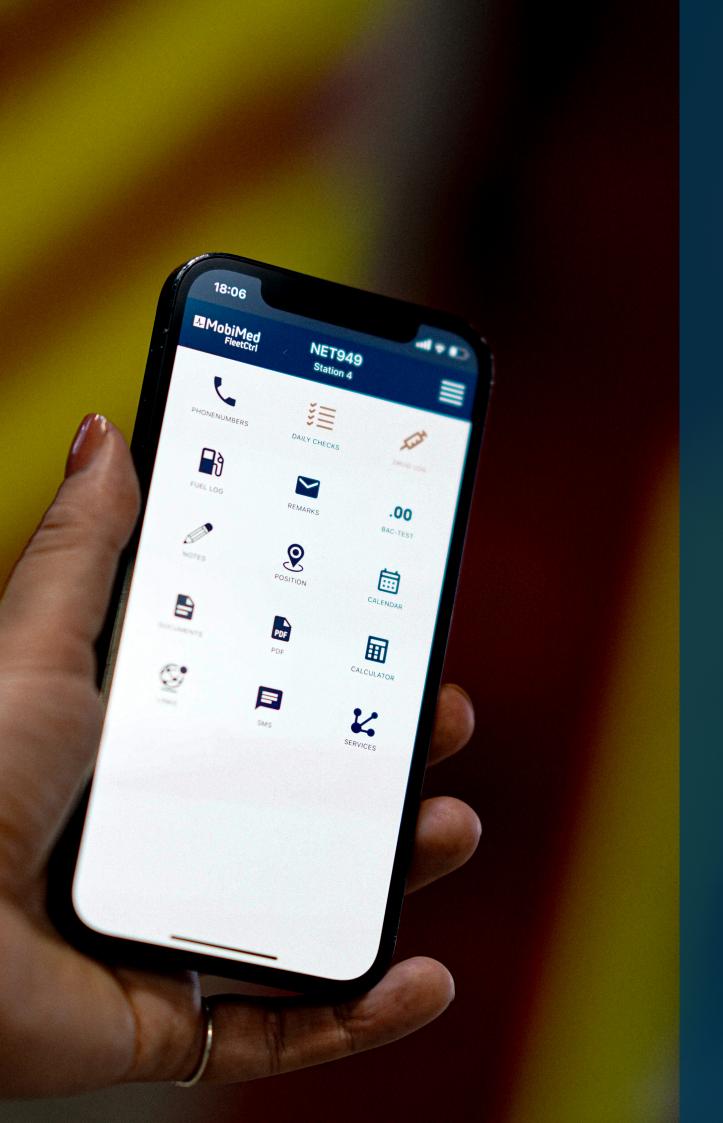

Inventory Management

MobiMed FleetCtrl empowers paramedics and administrators by providing an intuitive and userfriendly platform for medicine inventory management ensuring timely availability of medications. Embrace real-time monitoring and customisable alerts for enhanced efficiency and responsiveness. With our system, keeping track of medical supplies has never been easier, enabling you to focus on what matters most, saving lives.

Personalised Data Analysis

MobiMed FleetCtrl empowers you to access vital information, including personnel identities, shift logins, daily checks, and medical bag balances. This personalised approach to data analysis allows for performance assessments, identifying trends, and enhanced overall operational efficiency. Leverage data-driven decision-making to optimise resource allocation within your organisation.

Comprehensive Medical Bag Insights and Tracking

MobiMed FleetCtrl revolutionises the way you track medicine bags. With our color-coded system, red or green indicators identify drug carrier bags with a difference in their drug balance, along with the corresponding station and ambulance utilising them. Our user-friendly interface provides a clear understanding of the medications used in daily operations. Furthermore, our solution allows for individual sign-offs from paramedics, ensuring accountability and accurate documentation of dosages administered.

Dynamic Medicine Calculator for Informed Care

Our dynamic medicine calculator empowers you to deliver precise patient care. Easily creating symptom-specific medication guidelines, factoring in patient weight or age. With this feature, calculating the appropriate dosage becomes a breeze, even in offline mode, ensuring accuracy in every situation.

Employee Certification Management

FleetCtrl simplifies employee course tracking, helping admins keep up-to-date on completed certifications and training. Stay ahead of expiring certifications, ensuring your team remains prepared and compliant at all times.

Take control of your medicine inventory management with MobiMed FleetCtrl. Experience the simplicity, efficiency, and enhanced data analysis capabilities that our cutting-edge solution offers. Revolutionise your medical operations today and embark on a journey towards optimised inventory control. Contact us now or scan the QR code to schedule a personalised demonstration.

Telephone Number

Centralise the management of telephone numbers that are vital for seamless operational efficiency.

Communication

Effortlessly send comments to the relevant individuals and receive prompt responses within the application. Create SMS groups effortlessly to send text messages to employees or vehicles.

The Transport Agency

Receive notifications for vehicles nearing inspection dates.
Responsible individuals will be promptly alerted via SMS in case of any vehicle having driving restrictions.

Document

Ensure your employees have constant access to the most up-to-date versions of necessary documents and guidelines. New documents can be easily uploaded or created directly within the application.

Offline

All crucial features, including documents, PDFs, and phone numbers, remain readily available, even in the absence of internet connectivity on your phone.

Calendar

Streamline the vehicle booking process for various events with ease. The vehicles will promptly receive notifications within the app, empowering the staff to efficiently carry out the event, such as conveniently dropping off the car at the workshop.

Checks

Document regular equipment and vehicle inspections accurately, recording fuel consumption, controlled substances, and breathalyzer tests.

Daily Management

Stay updated on traffic disruptions and weather warnings. The information can automatically be fetched from transport and weather agencies.

SAVING VITAL SECONDS

With in-depth clinical knowledge and in close cooperation with users, Ortivus has developed MobiMed, a leading solution for communication and information sharing through the prehospital care chain.

MobiMed is a modular total solution for the healthcare of the future. The system is divided into five different product groups that can be integrated and adapted as needed.

- MobiMed Monitor, for patient monitoring
- MobiMed ePR, decision support and documentation
- MobiMed Life, stand-alone defibrillators
- MobiMed EnRoute, case management and navigation
- MobiMed FleetCtrl, for automated vehicle controls

MobiMed enables healthcare professionals to make the right decision at the right time at the same time as the system contributes to improved healthcare qualityand saved resources.
